

## Virsbolt 240 Connectable

The Virsbolt 240 Connectable offers the possibility of deeper reinforcement. The Virsbolt 240 Connectable is a bolt which consists of sections that are connected together with a rope threaded coupling. The required bolt length is achieved by adding one or more sections. Suitable for use when space does not permit ordinary Virsbolts.

### Technical Specifications

Technical Properties	Imperial	Metric
Bolt diameter (max)	1.65"	42 mm
Profile diameter	4.12"	36 mm
Material thickness	0.12"	0.12"
Upper bushing diameter	1.50"	38 mm
Inflation bushing diameter	1.61"/2.09"	41/53 mm
Hole diameter	1.70-2.05"	43-52 mm
Minimum breaking load	27 ton	240 kN
Minimum elongation	15%	15%
Typical elongation	20%	20%
Lenghts	5', 6', 7', 8', 10', 13'	1.5 m, 1.8 m, 2.1 m, 2.4 m, 3.0 m, 4.0 m

\*other lenghts available upon request
